PROFESSIONAL SUMMARY

- B.Tech CSE (AI & ML) Student
- Exploring DSA, Competitive Programming, Data Science, and Web Development
- Building projects with the MERN stack and Python's data science ecosystem
- Based in Delhi, India

OBJECTIVE

2nd year Computer Science (AI/ML) student with hands-on experience building full-stack web applications using Node.js, Express, and MongoDB.

Seeking a Web Development / Full-Stack internship to apply practical project experience and grow as a software engineer.

EDUCATION

Mirai School of Technology, Ghaziabad **Aug 2025 to Aug 2026**

B.Tech, Computer Science & Engineering (AI/ML)

2nd Year

TECH STACK

- C++
- HTML5
- EJS
- Seaborn
- GitHub
- schema design
- Python
- CSS3
- NumPy
- STL
- VS Code
- database connectivity
- JavaScript
- Node.js
- Pandas
- MongoDB
- RESTful routing
- responsive UI design
- Kotlin
- Express.js
- Matplotlib
- Git
- CRUD operations

PROJECTS

Mobile Store Management System

Node.js . Express . MongoDB . Mongoose . EJS

- Built a full CRUD web application to manage mobile inventory, including add, update, delete, and view operations.
- Designed MongoDB schemas with Mongoose and resolved real-world issues such as schema validation errors and duplicate key conflicts.
- Implemented server-side rendering with EJS templates and structured Express routes for a clean, maintainable codebase.

Portfolio Website - YBS Contracts Pvt. Ltd.

HTML . CSS . JavaScript . Deployment (Netlify/Vercel)

- Designed and built a complete business portfolio website for a construction company as freelance client work.
- Handled end-to-end deployment and explored hosting options to make the site publicly accessible.

Expense Tracker - Android App

Kotlin . Android SDK . OCR/Bill Scanning . SQLite

- Built an Android application to track and calculate monthly expenses, with automatic bill entry via camera-based bill scanning.
- Implemented a bill-splitting feature allowing users to divide expenses among friends and track shared balances.

Student Management System

Node.js . Express . MongoDB . Mongoose . EJS

- Developed a web app to manage student records with full CRUD functionality and MongoDB Atlas as the backend database.
- Debugged and fixed routing and file-structure issues to ensure smooth data flow between frontend and backend.

Zyntra Dating - Full Website

HTML . CSS . JavaScript . UI/UX Design . Deployed on Vercel

- Designed and built a complete website for a social/dating platform concept, including a multi-step registration flow with personality-type selection cards and photo upload.
- Focused on visual design and user experience across multiple UI revisions based on iterative feedback, and deployed the site using Vercel.
